Education

University Of Engineering and Technology, Lahore Lahore, Pakistan
Bachelors in Computer Science • CGPA(3.38) 2023 - 2027

Academic Experience

1. **Secure Cyber Reconnaissance**

Cybersecurity project focusing on stealth information gathering and attack surface mapping using modern reconnaissance techniques Lahore, Pakistan
Position: *Lead Researcher*
– ***Prevention*** *– Developed an early-warning framework for identifying vulnerabilities in simulated networks using passive intelligence techniques, reducing attack vectors by over 30% in test scenarios.*

2. ***Graphical Chess Game in MASM32***

Assembly language-based chess game simulation with move logic and UI in MASM32
Position*: Researcher*
– ***Optimization*** *– Designed efficient register-based move handling and implemented graphical representation using low-level pixel manipulation, enhancing performance and memory efficiency in resource-constrained environments*

3. ***Cross-Database Benchmarking Tool***

A Python-based tool to benchmark CRUD Operations, SELECT, JOIN, and aggregation performance across SQL Server, MongoDB, PostgreSQL, and Redis.
Position*: Developer (solo project)*
– ***Insight*** *– Built a complete benchmarking framework from scratch, designed schema initialization routines, collected comparative metrics, and visualized query performance across databases, revealing MongoDB's superior aggregation time for large JSON-like datasets*

4. ***Automated Restaurant Management System***

Comprehensive restaurant operations software developed for Software Engineering coursework
Position*: Documentation Lead & Research Contributor*
– ***Integration*** *– Led system documentation and collaborated with team members to define workflows, gather system requirements, and design the database. Developed an SQL-based structure to support seamless table ordering, user authentication, order tracking, billing, and customer feedback modules tailored specifically for restaurant environments.*

Currently Working On

Clothing E-Commerce Website
A fully functional online clothing store inspired by corporate fashion brands, built using MERN stack principles
Position: *Full-Stack Developer (Solo Project)*
– ***Scalability*** *– Designed and developed a secure, scalable e-commerce platform using HTML, CSS, JavaScript, Node.js, Express, and MongoDB. Implemented product listing, user authentication with JWT, cart functionality, admin panel for product management, and responsive UI reflecting a professional corporate design. The backend API architecture and Mongoose models ensure clean data handling and future extensibility.*

Extracurricular & Volunteer Experience

UET ACM SOCIETY Lahore, Pakistan
- *Event Management*
- *Coordinatior*

Kaar-e-Kamal Muridke
– Volunteer

Honors and Awards

ACADEMIC SCHOLARSHIPS
- Received Merit-based academic scholarship from Government. 2020 - 2025

ONLINE COURSES
- Python, Web Development, SQL, MongoDB, Java Script, Microsoft Office, DSA 2023 – 2025

Currently Learning

– *Skills:* Web Development, React, Tailwind CSS, Java Script

Additional

- *Technical Skills:* Beginner Python, C/C++, HTML, CSS, Bootstrap, Beginner JavaScript, Node.js, MongoDB, MySQL, Assembly (MASM32), Microsoft Office, VS Code, Markdown, Prompt Engineering, ChatGpt
- *Interests:* Software Development, Information Security, Databases, AI, Web Technologies, Cyber Security
- *Hobbies:* Cricket, Sports, Gaming, AI
- *Soft Skills:* Time Management, Communication, Problem Solving, Critical Thinking, Teamwork, Multitasking, Self-Learning, Research
- ***Languages:*** *Urdu, English, Punjabi*
